2. Please explain why this project could not be bid using the city's traditional bid process and the need to use JOC Procurement system.

DGS is requesting to procure the project with JOC due to security purposes. The building in which the work is to take place contains highly sensitive and confidential material such as evidence protection / recovery, SWAT, undercover organized crime units. By procuring the work with JOC, the security blueprints for this sensitive facility will not be available in the bid and bond room for anyone to pick up. By utilizing JOC, the City can control the number of blueprints that are distributed and to whom they are given.

3. If the project is a one trade project, please provide an explanation of why it would not be in the city's best interest to do the project using DGS trades or existing term agreements.

Multi - Trade

4. If it is anticipated that over 25% of the project will consist of Non Pre-Priced items, please provide an explanation on why JOC should be used.

All items contained in the CTC

5. If some elements of the proposed JOC Project scope of work are covered by city term agreements, these elements should be removed from the JOC Project.
