TRIP INFORMATION

Event Attended: Crude By Rail Emergency Response

Start Date: 10 Sept 18 End Date: 14 Sept 18

How did this event help you enhance your knowledge, skills, and abilities for your current position.

The class enhanced my skills in responding to tank car incidents. Refreshing my knowledge of incident command. Increasing my skills in the application of firefighting foams on incidents that require firefighting foam.

How did this even benefit the Urban Area?

Learning the proper techniques in dealing with tank car incidents protects lives and property. Being prepared for a tank car disaster when it happens is key to keeping the Urban Area safe.
