Re: Memorandums of Authorization (MOA) for the Residential Lighting Program

Dear Ms. Lumpkin:

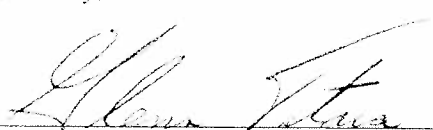

A Contract was recently award by DPS to be used primarily for construction the City's Residential Lighting Program. All projects constructed for this program are similar in scope and cost and therefore submitting an MOA for each individual work order under the program is redundant and unnecessary.

We therefore request that this one MOA (with the following Attachment A) be sufficient for all projects constructed under the Residential Light Program. We propose that for each project this MOA will be included in the Sub Order Release Package sent to DPS. MOAs and Attachment As will continued to be submitted for approval for any projects to be constructed with JOC that is outside the scope of the Residential Lighting Program.

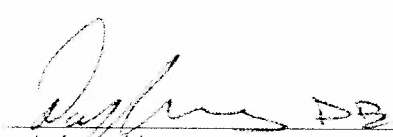

Please see Attachment A for additional details regarding the program.

If you concur with our recommendation, please sign below and return

Sincerely,

 2/13/07

UTILIZING JOC FOR THE CITY RESIDENTIAL LIGHTING PROGRAM

The Bureau of Electricity is continuing to provide construction services for the Mayor's Residential Lighting Program and the Aldermanic Menu Program with this Contract. The scope of work for these projects consists of the: furnishing and installation of davit light poles, helix foundations, piggyback light fixtures, handholds, directional bore conduit and other electrical equipment. Each project to be accomplished under the Residential Lighting Program will be of similar scope.

The Residential Light Program is a fast track program to provide residential lighting as quickly as possible to the various wards. When the program was first initiated, in order to meet the demanding time schedule, BOE performed the program with in-house forces. However, due to the increased work load and reduced forces, BOE in-house forces were unable to continue to do the program. So it was decided four years ago that JOC would afford BOE the ability to continue to perform the program in a timely manner. Under JOC, the Contractor starts construction in less than 20 days after the project design is prepared.

The cost of a typical project to provide lighting for two blocks is from \$100,000 to \$150,000. We anticipate constructing about 80 projects for the program in 2007.

Our Construction Task Catalog includes virtually every work task that will be required to accomplish the program. Therefore, we anticipate that the amount of Non Pre-priced work will be very small, less than 2% of the program value.
