SERVING THE YOUTH OF CHICAGO THROUGH STD/HIV HEALTH EDUCATION & TESTING

*Rx*Chicago
"Making Chicago a Healthier City"

ADOLESCENT HEALTH PROGRAM OVERVIEW

GOALS

Reduce the rates of STD/HIV disease among adolescents by working with youth in high morbidity areas, Chicago Public Schools, juvenile incarceration facilities, communities with large reentry populations and programs where large numbers of adolescents engaging in high-risk behaviors are located.

GUIDING PRINCIPALS

- Build on the assets and strengths of each youth for positive healthy behaviors and outcomes.
- Youth need and deserve a consistent, caring and supportive relationship with an adult.
- Provide accurate information for those adults who serve as caring supportive persons for youth.
- All program material is age and developmentally appropriate, gender specific and competent, non-judgmental, and culturally effective.
- The earlier the education and intervention occurs the more impact it will have for the individual.

The Adolescent program is currently collaborating with the following agencies/programs in order to provide STD/HIV health education and testing:

- Illinois Youth Center—Chicago (IYC-C)
- Cook County Juvenile Temporary Detention Center (CCJTDC)
- Chicago Public Schools (CPS)
- James Jordan Club and Family Center—Boys and Girls Clubs of Chicago
- Community based organizations
- YMCA of Metropolitan Chicago and many others.
