**Subject:** PET COKE NEEDS TO GO

My husband has lived on the east side since 1964, my parents & myself since 1977, and our daughter since 1995. While living here my husband has been diagnosed with mild asthma. I also suffer from asthma and am allergic to sulfur! My mom suffers from COPD! My daughter has environmental allergies. I believe this pet coke triggers our symptoms! When we get a strong wind blowing we need to shut the windows so the black stuff doesn't come in, but if we go out we can't get away from it unless you leave the area! Try driving west over the 106th or 100th Street bridges when the wind blows - it's like a black dust storm! Also the companies street sweeper is useless! All it does it make the streets wet & black, and kicks up more dust! PET COKE Needs to Go!!!! I appreciate the efforts everyone is trying to make. Lets Clean up Our Community for the sake of Everyone's Health!!!
