Leaks and Breaks FREE Lead Service Line Replacement

Summary

This Lead Service Line Replacement (LSLR) initiative offers to replace leaking or broken water service lines to impacted properties for FREE. Under Illinois State Law effective January 1, 2023, if your water service line is made of lead, galvanized iron, or steel, the service line must be completely replaced following a leak or a break. Thus, after a leak or break has been identified on a water service line, the City will replace the full water service line all the way into the property. Barring circumstances outside of the City's control, this replacement must be completed within 30 days of the leak or break.

What You Need to Do

If you receive this flyer following a repair to your lead water service line, contact the City to schedule the full replacement. **This construction work is FREE for you.**

Contact the City with your address, phone number/email, and date of leak or break:

- Calling 312-747-7530
- Scanning the QR code to fill out the survey
- Emailing LSLR@cityofchicago.org

REEMPLAZO GRATIS DE LA LÍNEA DE SERVICIO DE PLOMO DE FUGAS Y ROTURAS

Resumen

Esta iniciativa de reemplazo de línea de servicio de plomo (LSLR) ofrece reemplazar las líneas de servicio de agua con fugas o rotas a propiedades impactadas GRATIS. Bajo la Ley del Estado de Illinois a partir del 1 de enero de 2023, si su línea de servicio de agua está hecha de plomo, hierro galvanizado o acero, la línea de servicio debe reemplazarse completamente después de una fuga o rotura. Por lo tanto, después de que se haya identificado una fuga o rotura en una línea de servicio de agua, la Ciudad reemplazará la línea de servicio de agua completa hasta la propiedad. Salvo una circunstancia atenuante fuera del control de la Ciudad, este reemplazo debe completarse dentro de los 30 días posteriores a la fuga o rotura.

Lo que necesitas hacer

Si usted recibió este volante después de una reparación de su línea de servicio de agua con plomo, comuníquese con la Ciudad para programar el reemplazo. **Este trabajo de construcción es GRATIS para usted.**

Department Water Management Water Service Line Directory

LOOK UP YOUR SERVICE LINE

Check out DWM's new citywide water service line inventory website.

The service line is the pipe that carries water from the water main in the street to the property.

Scan the QR Code or visit
sli.chicagowaterquality.org

Once at the website, input the address to search and the results for the service line material will populate. Results will show either: Not Lead, Lead, Galvanized Requiring Replacement or Suspected Lead.

You should know:

- The Department of Water Management (DWM) has made all reasonable efforts to ensure that the information on Water Service Line Inventory website is accurate according to the information available to us, but accuracy is not in any way guaranteed.
- Having a lead service line does not automatically mean you have elevated levels of lead in the water. DWM adds corrosion control to the water to help prevent lead from leaching into the water. Each house will have different test results based on factors such as water usage (which refreshes the corrosion control coating in your pipes), interior plumbing, and previous periods of vacancy. To check the levels of lead in your water, **call 311 for free water testing**.
- In Chicago, lead paint is by far the biggest source of lead poisoning in children. It is a good idea to check your house for lead paint while also checking to see if you have a lead service line.

BUSQUE SU LÍNEA DE SERVICIO

Echa un vistazo al nuevo sitio web de DWM con inventario completo municipal de líneas de servicio de agua.

La línea de servicio es la tubería que lleva agua desde la tubería principal de agua en la calle a la propiedad.

Escanee el código QR o visite
sli.chicagowaterquality.org

Una vez en el sitio web, ingrese la dirección para buscar y los resultados para el material de la línea de servicio aparecerán. Los resultados mostrarán: No plomo, plomo, galvanizado que requiere reemplazo o sospecha de plomo.

Usted debe saber:

- El Departamento de Administración de Agua (DWM) ha hecho todos los esfuerzos razonables para garantizar que la información en el sitio web del inventario de líneas de servicio sea precisa de acuerdo con la información disponible para nosotros, pero la precisión no está garantizada de ninguna manera.
- Tener una línea de servicio de plomo no significa automáticamente que tiene niveles elevados de plomo en el agua. DWM añade control de corrosión al agua para ayudar a prevenir que el plomo se filtre al agua. Cada casa tendrá resultados de prueba diferentes basados en factores tales como el uso de agua (que revigoriza el revestimiento de control de corrosión en sus tuberías), plomería interior, y períodos anteriores de vacantes. Para verificar los niveles de plomo en el agua, llame al 311 para pruebas de agua gratuitas.
- En Chicago, la pintura con plomo es, con mucho, la mayor fuente de envenenamiento por plomo en los niños. Es una buena idea comprobar su casa para la pintura del plomo mientras que también comprueba si usted tiene una línea de servicio del plomo.

Water Testing

You can get your home's drinking water tested for free.

- The Department of Water Management (DWM) developed and began distributing in-home lead test kits in 2016.
- The free, at-home, lead test kit includes bottles to collect water samples, instructions on how to collect the samples and how to label the sample bottles.
- DWM has mailed more than 90,000 kits to Chicagoans since 2016. The certified laboratory testing results are available online for the public to review at chicagowaterquality.org.
- You can request a free lead test kit via 311 or by registering online at www.chicagowaterquality.org.
- You can also request in-person testing by a DWM Representative who will use the in-home kit for testing.

Water Quality and Consumer Confidence are top priorities at DWM.

There is no lead in the water when it leaves the water treatment plant. When lead is found in drinking water it is due to water dissolving the lead in pipes and plumbing.

Pruebas de Agua

Usted puede tener la agua de su hogar analizada gratis

- El Departamento de Administración del Agua (DWM) desarrolló y comenzó a distribuir kits de prueba de plomo para el hogar en 2016.
- El kit de prueba de plomo incluye botellas para recolectar muestras de agua, instrucciones sobre cómo recolectar las muestras y cómo etiquetar las botellas de muestra.
- DWM ha enviado más de 90,000 kits a los habitantes de Chicago desde 2016. Los resultados de las pruebas de laboratorio certificadas están disponibles en el internet para que el público los revise en chicagowaterquality.org.
- Usted puede solicitar un kit de prueba de plomo gratis llamando al 311 o registrándose en el internet en www.chicagowaterquality.org.
- También puede solicitar una prueba en persona por parte de un representante de DWM que utilizará el kit en su hogar para la prueba.

La calidad del agua y la confianza del consumidor son las prioridades principales de DWM.

El agua no contiene plomo cuando sale de la planta de tratamiento. Cuando se encuentra plomo en el agua potable, se debe a que el agua disuelve el plomo en las tuberías y la plomería.
