

JISC Data Report – October 2020

Prepared by the Chicago Police Department

Data time period: October 1 - October 31 2019 & 2020

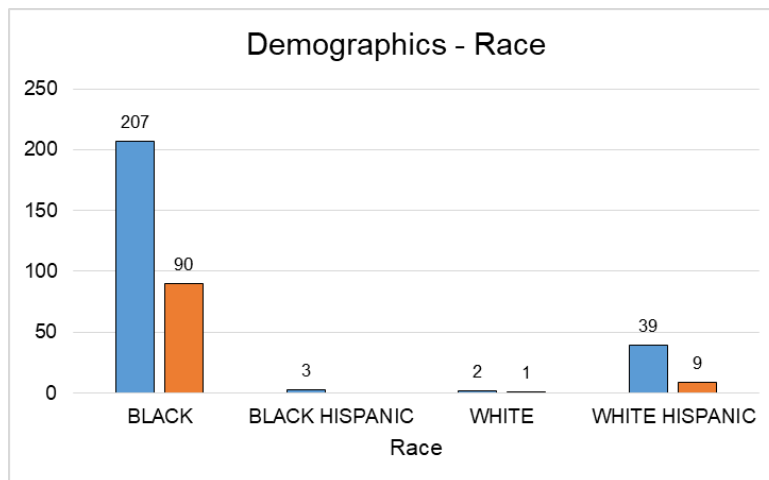

Summary

- In October 2020, 100 young people were processed at JISC, which is 60 percent fewer than the 251 during the same period in 2019.
 - Eight young people were referred to SGA case management and 14 were released to adult.
- Motor vehicle theft (30) and Drug abuse violations (27) were the most frequent JISC-processed arrest charges in October 2020.
- Compared to September 2019 there were decreases in the proportion of youth released to adult (14% of all instances or 14 cases in 2020 and 22% of instances in or 55 cases in 2019) and youth referred to SGA case management (8% of instances or 8 cases in 2020 and 14% of instance or 26 cases in 2019).
- The community areas with the most JISC processed arrests were Austin (15 youth) and Humboldt Park (20 youth).
- October 2019 and 2020 saw similar trends of most youth having few prior arrests (36% of young people had no prior arrest in 2020 and 2019). For the year following their youth who were arrested and processed at JISC in 2019, 186 youth (74%) were not re-arrested in the following year.
- The most common arrival hours in October 2020 were 12-2pm and 4-11pm. Additionally, JISC arrivals were most common Monday through Thursday and saw a slight decrease on Fridays through Sundays.
- Across the city for all JISC districts during both the 2019 and 2020 periods, most youth were in transit (between arrest and arrival at JISC) for less than 90 minutes, with 30-59 minutes being the range of most common transit times.
- Alternate dispositions (referred to as “overrides” in the OIG report) are not consistently collected by CPD at this time. As of early November 2021, CPD updated its data collection methods to improve quality and to ensure alternate dispositions, approval for such dispositions, and the explanations are documented.

1. Demographic Characteristics

In this period during 2020, the majority of those who have interacted with JISC are Black, male, or 15-17 years old.

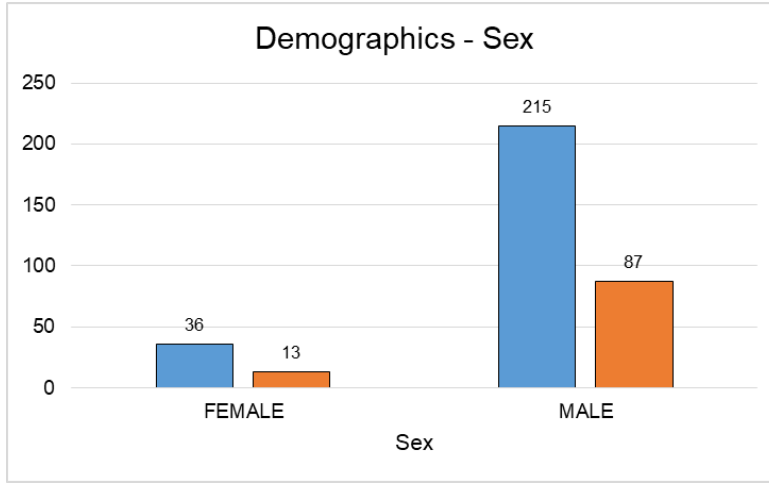

■ 2019 ■ 2020

 Data time period: October 1 - October 31 2019 & 2020

3. Disposition Data

Of the most common disposition outcomes in October 2020, the most prominent were court referrals (43% or 43 referrals) and released to adult (14% or 14 cases). Eight fewer young people were detained this month as compared to 21 in September 2020 and 20 fewer than October 2019. Meanwhile, compared to September 2019 there were decreases in the proportion of youth released to adult (14% of all instances or 14 cases in 2020 and 22% of instances in 2019) and youth referred to SGA case management (8% of instances or 8 cases in 2020 and 14% of instance or 26 cases in 2019).

In September 2020, the 11th and 15th districts were the most common arrest location for youth processed at JISC as compared to the 08th and 11th districts in 2019. All districts experienced a decrease as compared to 2019 and the 12th and 08th districts saw the most significant decrease in location of youth arrests who result in being processed at JISC, with approximately 60% reductions.

JISC Data Report – October 2020

Prepared by the Chicago Police Department

Data time period: October 1 - October 31 2019 & 2020

4. Re-arrest Rates²

October 2019 and 2020 saw similar trends of most youth having few prior arrests (36% of young people had no prior arrest in 2020 and 2019). For the year following their JISC-processed arrest 186 youth (74%) were not re-arrested in the following year.

■ 2019 ■ 2020

² Prior arrest counts are based on an individual's total number of arrests at the time they are processed at the JISC. Next year recidivism rate counts are based on the number of times an individual processed at the JISC from October 1, 2019 - October 31, 2019 was arrested from any point after the date of the initial arrest during the 12 month period to October 31, 2020.

Prepared by the Chicago Police Department

Data time period: October 1 - October 31 2019 & 2020

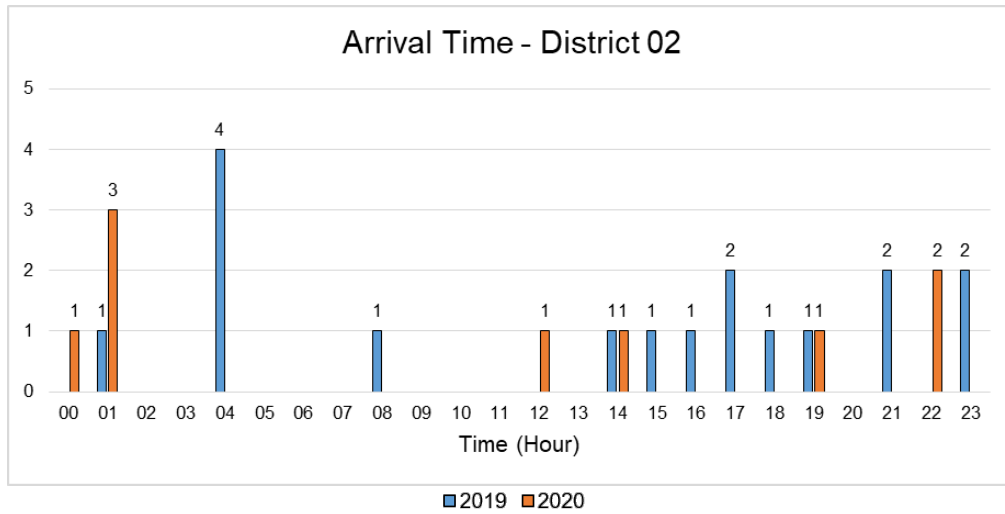

5. JISC Arrival Date and Time³ By District

The most common arrival hours in October 2020 were 12-2pm and 4-11pm. Additionally, JISC arrivals were most common Monday through Thursday and saw a slight decrease on Fridays through Sundays.

³ Arrival time is the date and time arrestee first arrives at JISC.

6. Movement Time^{4,5} By District

While a youth’s movement time before arriving at JISC is the responsibility of CPD patrol officers in each district, this analysis provides context for potential broader changes with youth interactions across CPD. Across the city for all JISC districts during both the 2019 and 2020 periods, most youth were in transit (between arrest and arrival at JISC) for less than 90 minutes, with 30-59 minutes being the most common. In October 2020, Districts 07 and 15 have the most youth who were transported for the longest time with 4 youth arrested in District 07 whose movement was more than 270 minutes (4.5 hours) and 8 youth in District 15 whose movement was more than 180 minutes (3 hours).

⁴ Movement time is based on the difference between arrest time and arrival time at JISC, given in minutes.

⁵ A small number of arrests have one or more incorrect time entered. Some movement time outliers (times greater than 300 minutes) are the result of these data inaccuracies.
