JUSTIFICATION FOR NON-COMPETITIVE PROCUREMENT

COMPLETE THIS SECTION IF NEW CONTRACT

For contract(s) in this request, answer applicable questions in each of the 4 major subject areas below in accordance with the Instructions for Preparation of Non-Competitive Procurement Form on the reverse side.

Request that negotiations be conducted only with Leica Geosystems, Inc. for the product and/or services described herein.
(Name of Person or Firm)

This is a request for (One-Time Contractor Requisition # 40179, copy attached) or Term Agreement or _____ Delegate Agency (Check one). If Delegate Agency, this request is for "blanket approval" for all contracts within the _____ (Attach List) Pre-Assigned Specification No. _____
(Program Name) Pre-Assigned Contract No. _____

COMPLETE THIS SECTION IF AMENDMENT OR MODIFICATION TO CONTRACT

Describe in detail the change in terms of dollars, time period, scope of services, etc., its relationship to the original contract and the specific reasons for the change. Indicate both the original and the adjusted contract amount and/or expiration date with this change, as applicable. Attach copy of all supporting documents. Request approval for a contract amendment or modification to the following:

Contract #: _____	Company or Agency Name: _____
Specification # _____	Contract or Program Description: _____
Modification #: _____	(Attach List, if multiple) _____
<u>Commander Joseph P. Murphy</u> Originator Name	<u>312-746-6740</u> Telephone
_____ Signature	<u>CPD</u> Department
	<u>9/23/08</u> Date

Indicate **SEE ATTACHED** in each box below if additional space needed:

INSTRUCTIONS FOR PREPARATION OF NON-COMPETITIVE PROCUREMENT FORM (Rev. 5/04)

If a City Department has determined that the purchase of supplies, equipment, work and/or services can not be done on a competitive basis, a sole source justification must be prepared on this "Justification for Non-Competitive Procurement Form" in which procurement is requested on a non-bid or non-competitive basis in accordance with 65 ILCS 5/8-10-4 of the Illinois Compiled Statutes. All applicable questions in each Subject Area below must be answered. The information provided must be complete and in sufficient detail to allow for a decision to be made by the Non-Competitive Procurement Review Board. Also attach a complete CPAC Project Checklist, and any other required forms (see Other #1, below). The Board will not consider justifications with incomplete information documentation

PROCUREMENT HISTORY

1. Describe the requirement and how it evolved from initial planning to its present status.
2. Is this a first time requirement or a continuation of previous procurement from the same source? If so, explain the procurement history.
3. Explain attempts made to competitively bid the requirement. (Attach copy of notices and list of sources contacted)
4. Describe all research done to find other sources. (List other cities contacted, companies in the industry contacted, professional organizations, periodicals and other publications used).
5. Explain future procurement objectives. Is this a one-time request or will future requests be made for doing business with the same source?
6. Explain whether or not future competitive bidding is possible. If not, why not?

ESTIMATED COST

1. What is the estimated cost for this requirement (or for each contract, if multiple awards contemplated)? What is the funding source?
2. What is the estimated cost by fiscal year, if the job project or program covers multiple years?
3. Explain the basis for estimating the cost and what assumptions were made and/or data used (ie. budgeted amount, previous contract price, current catalog or cost proposal from firms solicited, engineering or in-house estimate, etc).
4. Explain whether the proposed Contractor or the City has a substantial dollar investment in original design, tooling or other factors which would be duplicated at City expense if another source was considered. Describe cost savings or other measurable benefits to the City which may be achieved.
5. Explain what negotiation of price has occurred or will occur. Detail why the estimated cost is deemed reasonable.

SCHEDULE REQUIREMENTS

1. Explain how the schedule was developed and at what point the specific dates were known.
2. Is lack of drawings and/or specifications a constraining factor to competitive bidding? If so, why is the proposed Contractor the only person or firm able to perform under these circumstances? Why are the drawings and specifications lacking? What is the lead time required to get drawings and specifications suitable for competition? If lack of drawings and specifications is not a constraining factor to competitive bidding, explain why only one person or firm can meet the required schedule.
3. Outline the required schedule by delivery or completion dates and explain the reasons why the schedule is critical.
4. Describe in detail what impact delays for competitive bidding would have on City operations, programs, costs and budgeted funds.

EXCLUSIVE OR UNIQUE CAPABILITY

1. If contemplating hiring a person or firm as a Professional Service Consultant, explain in detail what professional skills, expertise, qualifications, other factors make this person or firm exclusively or uniquely qualified for the project. Attach copy of cost proposal and scope of services.
2. Does the proposed firm have personnel considered unquestionably predominant in the particular field?
3. What prior experience of a highly specialized nature does the person or firm exclusively possess that is vital to the job, project or program?
4. What technical facilities or test equipment does the person or firm exclusively possess of a highly specialized nature which is vital to the job?
5. What other capabilities and/or capacity does the proposed firm possess which is necessary for the specific job, project or program which makes them the only source who can perform the work within the required time schedule without unreasonable costs to the City?
6. If procuring products or equipment, describe the intended use and explain any exclusive or unique capabilities, features and/or functions the items have which no other brands or models, etc. possess. Is compatibility with existing equipment critical from an operational standpoint? Explain why.
7. Is competition precluded because of the existence of patent rights, copyrights, trade secrets, technical data, or other proprietary data? Attach documentation verifying such.
8. If procuring replacement parts and/or maintenance services, explain whether or not replacement parts and/or services can be obtained from any other sources? If not, is the proposed firm the only authorized or exclusive dealer/distributor and/or service center? If so, attach letter from manufacturer.

MBE/WBE COMPLIANCE PLAN

1. All submissions must contain detailed information about how the proposed firm will comply with the requirements of the City's Minority and Women Owned Business program. All submissions must include a complete C-1 and D-1 form, which is available on the Procurement Services page on the City's intranet site.

OTHER

Explain other related considerations and attach all applicable supporting documents (an approved Information Technology Strategy Committee (ITSC) form, an approved Request for Individual Contract Services form, etc.)

REVIEW AND APPROVAL

This form must be signed by both the Originator of the request and approved by the Department Head or authorized designee. After review and final disposition from the Board, this form will be stamped to indicate the final disposition and signed by the Chairperson of the Board of authorized designee. (c "This form must be signed by both the Originator of the request and approved by the Department Head or authorized designee. After review and final disposition from the Board, this form will be stamped to indicate the final disposition and signed by the Chairperson of the Board of authorized designee.")

EXCLUSIVE OR UNIQUE CAPABILITY

The ScanStation 2 from Leica Geosystems is the only 3D laser scanning system available which will provide the needs of the Department. Several features and benefits of the system combine to make the scanner unique and exclusive.

Unique Performance Factors – Hardware

The ScanStation 2 is the only enhanced 3D laser scanner to combine the following mission-critical Features into a single device:

Eye-safe laser scanner

- Why this feature is required: Safety of Crime Scene. It is anticipated that this equipment will be used at crime scenes where many police and emergency response personnel will be present and protecting their eye-sight from laser damage is of paramount importance.

Full 360 degree horizontal x 270 degree vertical field-of-view

- Why this feature is required: Evidence found at crime scenes can be found on floors, walls, ceilings and outdoors high up on buildings in the case of bullet impacts. Having a scanner able to “see” its entire surroundings (a.k.a. “Full dome scanning”) ensures that the user will be able to measure everything in the scene with a single scan without having to place targets in overlap areas for the registration of multiple scans.

Built-in Internal high resolution digital camera

- Why this feature is required: Having the ability to take a panoramic photography of a crime scene prior to laser scanning allows the user to automatically map the colors from the photo onto the point cloud while scanning. It also facilitates the rapid creation of “TruViews” (see TruView section below) of crime scenes for dissemination to detectives and the command chain which is a critical performance metric for this department.

Long range

- Why this feature is required: Crime scenes are found both indoors and outdoors. The ScanStation 2 has the ability to measure up to 300 meters and is not affected by either bright sunlight or total darkness. The Department needs a scanner that is versatile enough to operate in either environment.

Speed of up to 50,000 points measured per second

- Why this feature is required: Crime scenes begin to change from the moment they become crime scenes. Bodies start to decompose, blood evidence changes, and as soon as Crime Scene Investigators start to process the scene the scene changes. The speed of the ScanStation 2 will ensure that the entire scene can be laser scanned as fast as possible so that the scene can be processed in a timely fashion.

High-Accuracy

- Why this feature is required: If the data you collect at a scene is not accurate, you may be as well as not collect it at all as there is a risk of jeopardizing the entire case if inaccurate data is measured. The accuracy of a single measurement from the Leica Geosystems ScanStation 2 is better than 6 millimeters at a range of 50 meters.

Dual-axis compensation

- Why this feature is required: The ScanStation 2 has a dual-axis compensator which enables it to know which way is up at all times. This means that you can scan ballistic trajectory rods and then compute the elevation angle and azimuth of the rod relative to a wall or a car. This method has been the subject of a validation study by a well known firearms examiner and the results were presented at the American Academy of Forensic Sciences 2008 Annual Meeting. This is the only validation study of its kind and this will be important for the department when we start to bring scan data into the courtroom.

Unique Performance Factors – Software/Warranty

In addition to the hardware component of the system, Leica's Cyclone software has several unique capabilities as follows:

Web publishing feature – TruView

- Why this feature is required: It is the department's goal to be able to quickly convert the scan data captured at a crime scene into a format which can be posted to a secure department server and then streamed over the internet for review by investigators and command staff using Microsoft Internet Explorer and Leica's free TruView plug-in.

Warranty

- Why the warranty is unique: The warranty is a three year warranty where Leica Geosystems will ship out within 48 hours a replacement scanner while the original scanner is being maintained or repaired. Allowing the department to continue its operational needs of deploying this piece of equipment at crime scenes. The warranty also includes access to Leica's hotline where technicians will work with the end users to trouble shoot the problem.

SCOPE STATEMENT:

Attached is a Detailed Scope of Services and/or Specification

IMPORTANT: THIS IS A CRITICAL PORTION OF YOUR SUBMITTAL. IN ORDER FOR DPS TO ACCEPT YOUR SUBMITTAL YOU MUST COMPLETE THE SPECIFIC SCOPE REQUIREMENTS AS SET FORTH IN THE SUPPLEMENTAL CHECKLIST FOR THAT UNIT.

The following is a general description of what should be included in a Scope of Services or Specification:

A clear description of all anticipated services and products, including: time frame for completion, special qualifications of prospective vendors, special requirements or needs of the project, locations, anticipated participating user departments, citation of any applicable City ordinance or state/federal regulation or statute.

TYPE OF PROCUREMENT REQUESTED (check all that apply):

NEW REQUEST

- Blanket Agreement
- Standard Agreement
- Small Orders

MOD/AMENDMENT

- Time Extension
- Vendor Limit Increase
- Scope Change/Price Increase/Additional Line Item(s)
- Other (specify):

FORMS: Requisition Special Approvals Non-Competitive Review Board (NCRB)

CONTRACT TERM: 5YRS Requested Term (number of months): 3 YR W/ 2-1 EXTENSION

DPS PROJECT CHECKLIST

PRE BID/SUBMITTAL REQUIREMENTS:

Requesting Pre Bid/Submittal Conference? Yes No Requesting Site Visit? Yes No

ARCHITECTURAL/ENGINEERING SUPPLEMENTAL CHECKLIST

Required Attachments: Scope of Services, including location, description of project, services required, deliverables, and other information as required

Risk Management

Will services be performed within 50 feet of CTA train or other railroad property? Yes No
Will services be performed on or near a waterway? Yes No

If applicable, Pre-Qualification Category No. Category Description:

For Pre-Qualification Program, attach list of suggested firms to be solicited

Other Agency Concurrence Required: None State Federal Other (fill in)

AVIATION CONSTRUCTION SUPPLEMENTAL CHECKLIST

DOA sign-off for final design documents: Yes No

Required Attachments:

Copy of Draft Contract Documents and Detailed Specifications.

Risk Management:

Current Insurance Requirements prepared/approved by Risk Management: Yes No

Will work be performed within 50 feet of CTA or ATS structure or property? Yes No

Will work be performed airside? Yes No

***NOTE:** Any non-construction Aviation request, complete the applicable section.

COMMODITIES SUPPLEMENTAL CHECKLIST

Required Attachments: Detailed Specifications (Scope of Services) including detailed description of the product, delivery location, user department contact, price escalation considerations, Bidder's qualification, contract term and extension options, Contractor's qualifications, citation of any applicable City/State/Federal statutes or regulations, citation of any applicable technical standards and Price Lists/Catalogs, technical drawings and other exhibits and attachments as appropriate.

If Modification request, please verify and provide the following:

Contractor's Name:

Contractor's Address:

Contractor's e-mail Address:

Contractor's Phone Number:

Contractor's Contact Person:

CONSTRUCTION SUPPLEMENTAL CHECKLIST

Required attachments:

Copy of Draft (80% Completion), Contract Documents and Detailed Specifications

Risk Management

Will services be performed within 50 feet of CTA train or other railroad property? Yes No

Will services be performed on or near a waterway? Yes No

DPS PROJECT CHECKLIST

VEHICLES/HEAVY EQUIPMENT SUPPLEMENTAL CHECKLIST

Required Attachments:

- Detailed Specifications including detailed description of the vehicle(s) or equipment, mounted equipment, if any, and options/accessories.
- Special Provisions (Delivery, Warranty, Manuals, Training, Additional Unit Purchase Options, Bid Submittal Information, etc.)
- Delivery Location(s)
- Technical Literature
- Drawings, if any
- Part Number List (Manufacturer; or Dealer; or Other Source:)
- Current Price List(s)/Catalog(s)
- Special Approval Form
- Exhibits and Attachments

If **Modification request**, please verify and provide the following:

Contractor's Name:

Contractor's Address:

Contractor's e-mail Address:

Contractor's Phone Number:

Contractor's Contact Person:

PROFESSIONAL SERVICES SUPPLEMENTAL CHECKLIST

- Detailed description of project listing obligations of each party.
- The Schedule of Compensation
- Deliverables
- Request for individual contract services (if applicable)
- The appropriate EPS form
- ITSC (approved by BIS)
- OBM (approved by Budget form/memo)
- Grant document attached

Attach any documentation indicating any previous purchase activity to assist in the procurement process

TELECOMMUNICATIONS AND UTILITIES SUPPLEMENTAL CHECKLIST

Required Attachments: Detailed Scope of Services/Specification which sets forth all of the anticipated services and products the user department wants provided, including time frame for completion, special qualifications of prospective vendors, special requirements or needs of the project, locations, anticipated participating user departments, citation of any applicable City ordinance or state/federal regulation or statute.

Has the project been reviewed by DGS? Yes No

Attach copy of DGS Recommendation; Reservation(s); or participate under current contract.

Does the project include software? Yes No

If yes, is signed ITSC form attached? Yes No

Does the location involve:

A public way? Yes No

Any concession in the City's facilities? Yes No

Is it anticipated City Council approval of the project or contract will be required? Yes No

DPS PROJECT CHECKLIST

WORK SERVICES/FACILITY MAINTENANCE SUPPLEMENTAL CHECKLIST

Required Attachments: Detailed Specifications (Scope of Services) including detailed description of the work, locations (with supporting detail), user department contacts, work hours/days, laborer/supervisor mix, compensation and price escalation considerations, Bidder's qualification, contract term and extension options, Contractor's qualifications, citation of any applicable City/State/Federal statutes or regulations, citation of any applicable technical standards and Price Lists/Catalogs, technical drawings and other exhibits and attachments as appropriate.

Risk Management:

Will services be performed within 50 feet (50') of CTA train or other railroad property? Yes No

Will services be performed on or near a waterway? Yes No

Will services require the handling of hazardous/bio-waste material? Yes No

Will services require the blocking of streets or sidewalks which may affect public safety? Yes No

If Modification or Amendment request, please verify and provide the following:

Contractor's Name:

Contractor's Address:

Contractor's e-mail Address:

Contractor's Phone Number:

Contractor's Contact Person:

Bill To:

Ship to:

Chicago Police Dept.

SCANSTATION 2 ENABLES CRIME SCENE INVESTIGATION

- + Accurate, complete, and detailed 3D data for scene reconstruction
- + Complete and accurate 3D data for scene reconstruction
- + Complete and accurate 3D data for scene reconstruction
- + Complete and accurate 3D data for scene reconstruction
- + Complete and accurate 3D data for scene reconstruction

Forensic 3D Laser Scanning by Leica Geosystems

Crime Scene Investigation

Capture the scene in vivid 3D exactly as the first responder found it. Extract any desired measurement, years later if needed! View from any angle. Establish lines of sight. Measure ballistic trajectories. Share scene data with D.A. and others over the web using the free viewer. Create compelling jury exhibits.

Officer Involved Shootings

More and more law enforcement agencies are deploying Leica 3D laser scanning as part of an overall risk management strategy to defend against OIS civil lawsuits. Just one successful defense pays for the cost of this amazing technology many times over.

Terrorism & Homeland Security

Before you can perform a vulnerability and threat assessment for a site, you need to understand the site you have. The ScanStation 2 can be a key component for your homeland security program by allowing you to perform modeling, simulation and analysis based upon what is really there.

Post-event Forensics

Be it a crash investigation, fire scene reconstruction, bomb blast or other catastrophic event, the ScanStation 2 will allow you to map it all in vivid detail at a safe distance. Use indoors or out in any lighting conditions. Long range and very accurate.

Scan – Analyze – Measure – Diagram – Share and find the truth with the Leica ScanStation 2

The ScanStation 2 from Leica Geosystems is a versatile 3D laser scanning solution which rapidly captures and measures everything in a scene, not just what may be considered important at the time. Ideal for complex environments and with a 100% acceptance record in U.S. courts, ScanStation 2 is a cure for the CSI Effect. For more information and to receive an example of what Leica 3D laser scanning is capable of, contact Tony Grissim at 831-643-2972 or tony@lgshds.com.

Frequently Asked Questions about the Leica Geosystems ScanStation 2

What is it?

A fast, very accurate long-range, tripod-mounted 3D laser scanner integrated with a high-resolution panoramic camera, and with a powerful set of software tools for creating detailed 2D scene diagrams and/or vivid 3D animations of simple or complex scenes.

What does it do?

The ScanStation 2 photographs the scene, then laser scans (measures) whatever is in its field-of-view. The scan data is called a "point cloud" which is made up of millions of individual 3D measurement points (a.k.a. "coordinates", exactly like what a total station outputs). The result from a completed scan is a visually stunning rendering of the scene in 3D from which any measurement can be made, even long after the scene has been released.

Why is the data so compelling to a jury?

3D laser scan data is not someone's reconstructed *interpretation* of the scene. It *is* the scene. Being able to virtually revisit the scene frozen in time exactly as the first responder found it provides public safety officials (and jurors with high expectations due to the "CSI Effect") with a powerful way to visualize and place themselves into the scene.

Why is the data so useful to investigators?

Most forensic professionals agree that the single most valuable benefit gained from the technology is the ability for investigators to virtually return to the controlled crime scene and easily extract out additional measurement and viewpoint data which may be key to their investigation. This can be done days, weeks, or years later long after the scene has been released and can be especially important should the scope and direction of the investigation change as new evidence comes to light and new theories are explored.

Who can make use of the scanner and its data?

Crime scene unit personnel, criminalists, detectives, homeland security units, incident managers, bomb technicians, arson investigators, prosecutors, crash investigators, risk managers, medical examiners, shooting reconstructionists, forensic animators, SWAT teams, and failure analysis investigators. Using the free Leica TruView software scene data can be shared with non-technical users in the command chain, even over the web.

Where can the ScanStation 2 be used?

The ScanStation 2 can be operated indoors or out, in bright sunshine or in total darkness. The scanner's ability to measure up to 300 meters makes it an ideal tool for law enforcement and public safety officials to document and archive complex environments.

Can the scanner be used for homeland security applications?

Yes. Some police agencies are buying ScanStation 2's using homeland security funding, because the system can be used for vulnerability and threat assessments as well as training and table-top exercises.

Has the data from Leica scanners been accepted as evidence in U.S. Courts?

Yes. Reconstructions created from Leica scan data have a 100% acceptance rate in U.S. Courts.

Can the scan data be imported into the software that I currently use?

Yes. Almost all third party software is compatible with data from the ScanStation 2.

How can I get more information?

Contact Tony Grissim at 831-643-2972 or tony@lgshds.com

For more information and video clips on how law enforcement is using Leica 3D laser scanning, please visit www.leica-geosystems.us/forensic

Subject: Leica company info and updated proposal

Attachments: CPD x 2 Q3.pdf

CPD x 2 Q3.pdf (35 KB)

Molly,

We have looked at trying to comply with the City's MBE/WBE requirement six ways from Sunday and I don't think we can. The instrument is built in Switzerland, shipped to our U.S. distribution center then shipped via FedEx to the customer. Our software is developed in the Bay Area. It looks like I will need your assistance in getting Compliance to recognize our unique situation and give us a pass.

Below is our company information for vendor registration as well as an updated proposal featuring our latest part numbers and recommended forensic products.

What happens from here?

- Tony
